Educational and Ethical Leadership - Best Practice

The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy, with special interests in the
interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

This means acting ethically, responsibly and commercially. Practical Consultancy Ethics approaches the subject of ethics from the individual's perspective: the management or IT consultant who will need to make ethical decisions within their engagement. With clear-sighted identification of the ethical dilemmas that may arise at each stage of a consultancy project - from defining the problem to fit the solution, through to prioritizing competing stakeholder needs, and having access to confidential client information - and guidance on ethical and risk-reducing actions that consultants can take, the emphasis throughout is on improved decision-making. Enhanced with case studies showcasing real-life ethical pitfalls and featuring consultancy ethical dilemmas to challenge the reader, this is a uniquely practical guide to applying best ethical practice in consulting engagements.

Selling Today: Partnering to Create Value, Global Edition

For decades, research has shown the importance of ethics in the business environment. With the increased internationalization of corporations, the need for a focus on international business ethics has also increased. To date, research has predominantly focused on business ethics in large firms and the factors that affect the ethical decision-making processes of the managers and executives in these firms. What appears to be limited in literature is ethics and ethical decision-making as it relates to small businesses. With the economic importance of small businesses, this area of research needs to be explored especially from a cross-cultural basis. This dissertation helps to fill that gap. Building on existing research, this study seeks to explore the factors that contribute to and influence the ethical decisions of small business owners and managers in an emerging market, specifically India. The methodology and tests used in this study will provide a foundation to better understand how these ethical factors affect the ethical decisions of small business owners and managers in emerging markets.

Organisational Behaviour

Instances of wrongdoing in and by organizations have featured heavily in news headlines in recent years. Why do organizational participants—employees, managers, senior officials—engage in illegal, unethical, and socially irresponsible behavior? The dominant view of wrongdoing as an abnormal phenomenon assumes that the perpetrator is a rational, proactive actor, working in isolation. However, Palmer develops an alternative approach in this book, examining wrongdoing as a normal occurrence, produced by boundedly rational actors whose behaviour is shaped by the immediate social context over a period of time. The book provides a comprehensive critical review of the theory and research on organizational wrongdoing. By using rich case study material, it illuminates different perspectives, potential explanations, and policy suggestions for the reduction of organizational wrongdoing.
