OBJECT: PHOTO shifts the dialogue about modernist photography from an emphasis on the subject and the image to the actual photographic context, created by a certain artist at a certain time and place and the influence of this shift is especially significant for the study and practice of photography within which photography developed into a distinctive formal language. A growing awareness of the rarity of images made between the two world wars has altered historians’ considerations, encouraging new approaches privileging the originality of each work and the density of references each contains. This richly illustrated publication culminates a four-year collaborative endeavor between The Museum of Modern Art’s Departments of Photography and Conservation, and nearly 30 visiting scholars, on the material and aesthetic evolution of avant-garde photography in the early twentieth century. The 341 monochromatic photographs known as The Thomas Walther Collection, a major museum acquisition made in 2001, is presented in its entirety, establishing a new standard of depth for the medium. Essays by curators, researchers, and conservators consider the history of collecting from this era to the present and how deepening knowledge has shifted the perspective on the medium. The collection itself, however, includes photographs by 1200 photographers and makers of the world. New in this expanded edition are photographs, including many never before published, that shed new light on the development of modernist photography.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, like a who's who of commercial artists in "East" Germany. Written primarily as a text for advanced journalism students, practicing journalists will profit as well from this invaluable back-to-basics approach to news collection and reporting.

Americans scarred by the experience of 9/11 often express this sentiment. But what remains the same, argues Jack Shaheen, is Hollywood's stereotyping of Arabs. In his new book about films made after 9/11, Shaheen finds that nearly all of Hollywood's post-9/11 films legitimize a view of Arabs as stereotyped villains and the use of Arabs and Muslims as shorthand for the "Enemy" or "Other." Along with an examination of a hundred recent movies, Shaheen addresses the cultural issues at play since 9/11: the government's public relations campaigns to win "hearts and minds" and the impact of 9/11 on citizens and on the imagination. He suggests that winning the "war on terror" would take shattering the centuries-old stereotypes of Arabs, and frames the solutions needed to begin to tackle the problem and to change the industry and culture at large.School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. This book presents Atget's albums in full for the first time, edited with the sequencing and repetition that the great photographer intended. In addition, Atget's pictures are analyzed in an altogether new way, as commercial picture documents produced by a photographer for the artists, architects, antiquarians, designers, and builders who were his clients. Drawing on many interviews and newsroom observation, this book addresses an overlooked but important aspect of international journalism by examining how journalists carry out their daily work at the transnational and regional transborder level. What is it about certain books that makes them bestsellers? Why do some of these books remain popular for years and others fade gently into obscurity? And why is it that when scholars do turn their attention to bestsellers, they seem only to be interested in the same handful of blockbusters, when so many books that were once immensely popular remain under-examined? Addressing those and other equally pressing questions about popular literature, Must Read is the first scholarly collection to offer to other scholars the evolution of American bestsellers as well as critical readings of some of the key texts that have shaped the American imagination since the nation's founding. Focusing on a mix of enduring and forgotten bestsellers, the essays in this collection consider 18th and 19th century works, like Charlotte Temple or Ben-Hur, that were once considered epochal but are now virtually ignored; 20th century favorites such as The Sheik and Peyton Place; and 21st century blockbusters including the novels of Nicholas Sparks, The Kite Runner, and The Da Vinci Code. From the ruins of communism, Boris Groys emerges to provoke our interest in the aesthetic goals pursued with such catastrophic consequences by its founders. Interpreting totalitarian art and literature in the context of cultural history, this brilliant essay likens totalitarian art to the modernists' goal of producing world-transformative art. In this new edition, Groys revisits the debate that the book has stimulated since its first publication. From the reality TV show "Superstar" to Formula One ace Michael Schumacher, "Pop Culture Germany!" explores the exciting world of contemporary German popular culture.
