Entrepreneurship and globalization are two much-examined forces as we enter the new millennium—yet very little has been published on the intersection of small and medium-sized enterprises (SMEs) and the global economy. To close the gap, this volume delves into the intricate roles and consequences of such businesses on both global and domestic economies. The first part of the volume provides an overview of the phenomenon of globalization, arguing that entrepreneurial discovery and technological change lead to globalization, which in turn leads to further opportunity for entrepreneurial discovery—no less for SMEs than for multinational corporations. In part two, the essays examine the role of SMEs in the global economy and why they are thriving. Part three reviews the roles of SMEs and innovators and examines their roles in direct foreign investment. Part four explores the role of technological diversity and knowledge spillovers as a way to explain the superior innovative performance of SMEs. Part five looks at the role of SMEs in technology transfer. Finally, part six examines the theoretical and policy implications of the international activities of SMEs, suggesting that policies should aim to reduce the costs in international expansion for SMEs. This volume will provide the foundation for further study in SMEs and globalization. It will appeal to scholars and students in both international business and economics. Zoltan J. Acs is Professor of Economics and Finance, University of Baltimore. Bernard Yin Yeung is Professor of International Business, University of Michigan.

This edited volume “Food Security in Africa” is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of food safety and availability, water issues, farming and nutrition. The book comprises single chapters authored by various researchers and edited by an expert active in the public health and food security research area. All chapters are complete in itself but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors on Africa’s food security challenges, quality of water, small-scale farming as well as economic and social challenges that this continent is facing. Hopefully, this volume will open new possible research paths for further novel developments.

Small scale industries play a key role in the industrialization of developing countries. This is because they provide immediate large-scale employment and have a comparatively higher labour capital ratio: they need a shorter gestation period and relatively smaller markets. They need lower investments, offer a method of ensuring a more and equitable distribution of national income and facilitates an effective mobilization of resources of capital and skill. The small scale sector in India has played a very important role in the socio-economic development of the country during the past 50 years. In has significantly contributed to the overall growth in terms of the GDP, employment generation and exports. The performance of the small scale sector therefore has a direct impact on the growth of the overall economy. This study is restricted to the role of small scale sector in Indian economy. India is a poor country mainly depending on agriculture. The role of small scale sector in its economic development is highlighted. This study deals with the role of SSI in empowering weaker sections. SSI has been considered as one area where women workers are in good number.

Micro, Small & Medium Enterprises (MSME) have been playing an important role in the overall economic development of a country like India, where millions of people are unemployed or underemployed. The economic development of any country primarily depends upon the establishment of industries. MSME sector comprises 95 per cent of the total industrial units in the country. The hunt for funding has been the bane of an entrepreneur’s existence from times of yore. Many abandon their dream to build, create, and innovate in the face of this difficult struggle without realising that a good business idea will eventually pool in the bounty-full once it has secured a place in the market. Your idea will bring you your company, your company will bring you the people, and the people will bring you the market. A good idea has no monetary value, just a whole lot of bursting potential. Today, the World's most successful entrepreneurs like Dhiru Bhai Ambani and Karsanbhai Patel – Man behind NIRMA may hold the possibility of building pyramids out of notes, but none of them started at the top of the ladder. Facebook was created out of a Harvard dorm room at minimal cost and Microsoft was formed two years after Gates decided to drop out of college. For an entrepreneur starting out, it makes good business sense to avoid ideas that require high capital investment in equipment, land, etc. Venturing into the manufacturing business requires to divide time and effort between making business plan, creating the product, and selling. It is best to venture into product areas that requires small to medium investment, which can be returned within few years.
If one wants to start off on his own, this book provides some manufacturing business ideas with small and medium investment. The major contents of the book are India Government Loan Schemes for Small Scale Businesses, Government Support for Innovation and Entrepreneurship in India, Pradhan Mantri Mudra Yojana, Packaging and Labeling, Products Packaging, Marketing, Onion Dehydration, Garlic Dehydration, Onion Pickle, Onion Chutney, Garlic Oil, Onion Powder, Ginger Oil, Ginger Powder, Ginger Paste, Tomato Pulp, Tomato Paste, Tomato Ketchup, Tomato Powder, Disposable Blood Bags, Disposable Masks, Disposable Surgical Catheters, Disposable Plastic Syringes, Plastic Cups, Disposable Banana Leaf Plate, Facial Tissue & Baby Wet Wipes, Urea Formaldehyde Resin Adhesive, Toothpaste Production, Gypsum Board, Surgical Absorbent Cotton, Glass Fibre, Complex Fertilizers, Activated Carbon from Wood, Biscuits, Candy, Chocolates, Milk Powder, Instant Noodles, Khakhra, Soft Drinks, Spices and Sample Plant Layouts. If you ever had an idea that you want to turn into a profitable business endeavor, this book will be a mile stone for you. Remember Dhirubhai Ambani said, “Ideas are no one’s monopoly Think big, think fast, think ahead.”

Small and micro enterprises have been an important theme in development thinking since 1950s, yet for, a variety of reasons East African governments and, administrations have been sceptical about, their role in their own countries’ development. While many constraints have been lifted by the, more liberal policies of the 1990s, many micro,entrepreneurs and their labourers, primarily, women, are still fighting for an enlarged social space. The papers in this book describe these, strategies of negotiation between rural micro,enterprises and the new liberalised rural economy.
